

River Thames conditions advice for boaters

New quick dial numbers

Our Floodline system has been updated, so we have made some changes to our telephone river advice information.

Our Floodline phone number remains the same 0345 988 1188. Select option 1 for river information for boaters, when prompted enter one of the quick dial numbers below for the area of the river you want to hear about.

If you call the quick dial number and the message states ' there are no messages for this area' then there are currently no boards being displayed at our locks.

You can still view our river advice on the River Thames Conditions website www.environment-agency.gov.uk/riverthamesconditions.

Our warning boards and what they mean

STRONG STREAM ADVICE

**Do not attempt to navigate
difficult and dangerous flows**

www.environment-agency.gov.uk/riverthamesconditions

When we are displaying these boards at locks, we advise users of all boats not to navigate because the strong flows make it difficult and dangerous. Those in hire boats arriving at a lock where these boards are displayed should stop immediately and contact their hire boat operator to ask their instructions.

**CAUTION
Stream Increasing**

www.environment-agency.gov.uk/riverthamesconditions

When we are displaying these boards at locks, we advise users of all unpowered boats not to navigate and users of powered boats to find a safe mooring. This is because river flows are likely to strengthen and red boards could be displayed very soon and without warning.

**CAUTION
Stream Decreasing**

www.environment-agency.gov.uk/riverthamesconditions

When we are displaying these boards at locks, we advise users of all unpowered boats not to navigate and users of powered boats to navigate with caution.
